THE NITROGEN PLATFORM

Globally optimized application delivery platform which seamlessly works with any Commerce Platform.

Nitrogen Platform is an end customer aware optimized global delivery platform which seamlessly works with all commerce platforms making storefront highly available in peak traffic, improves performance through non-intrusive optimization for any location, any device, and any platform at reduced total cost of ownership.

Nitrogen keeps things simple for your business: no performance worries, no scalability headache, no security concerns and yet, a more responsive application and a sublime digital experience. Nitrogen provides a drop-in platform that enhances web site performance and scalability while reducing infrastructure cost and additionally providing unprecedented insight into the system usage.

Nitrogen's SaaS offering is easy to implement and is backed by our 360 degree Proactive and Reactive support team.

Nitrogen can be leveraged by any static, information portal, dynamic transactions and consumer media sites ex: Retail, Manufactures, Market Places, Travel, Telco, Banking, Insurance, News & Magazines etc.

America's most rare meats, delivered to your door.

Buy the price, save a little. Buy the room, save a lot!

N7.io

THE NITROGEN PLATFORM

53 Edge Nodes
40 Tbps Capacity
5 Continents
1 Network

30%	Reduction in infrastructure cost	10X	More Users	Benefits
6%	Increase in conversion rate	40%	Reduction in CPU & Heap Utilization	
16%	Increase in CSAT	40%	Reduction in bandwidth cost	
300%	Increase in web performance	20%	Reduction in cart abandonment	

Features	Ubiquitous Presence	Multi-tier Caching	Fast Global Network Routing	Dynamic to Static	Minification	Device specific Optimization
	Compression	Request Reduction	HTML in-lining	Domain Sharding	Local Delivery storage	HTMLization
	Progressive Rendering	Multi origin Support	Super-fast cache invalidation	Real time Analytics	Web Application Firewall	100% SSL traffic at no extra cost

100% uptime for end users – even if core application servers are not functional

Reduce the Page Load time for all end users irrespective of device and locations.

Maximizing the throughput and increasing the return on investment many folds.

Improve performance and scalability at various levels:
Browser & Devices
Global Content Delivery
Web Server
Application

Integrates with most Commerce Solutions.

Instantaneous Rendering of Catalog pages.

100% HTTPS traffic without any cost escalations.

Wrap your application with a Web Application Firewall (WAF) providing an added layer of security.

Rate Limiting configuration mitigates against DDoS attacks.

- Deep insights in your platform
- SAP Hybris (v)
- ORACLE COMMERCE
- Magento
- WORDPRESS
